REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed invention of either a method of making a ceramic fiber composite including the steps of forming, impregnating, drying, calcining, then firing a substrate to form a ceramic fiber composite bonded by at a ceramic binder having a porosity of less than 65% or a composite bonding ceramic fibers together having a binder of chemically stabilized beta cristobalite resulting in a porosity of less than 65% is not found in the prior art either singly or in combination. These patentably distinct features are found in independent claims 1 and 21 respectively. The closest prior art is considered Shizukuisha et al. (US 6,095,800), cited in this action, which discloses a fire resistant porous mat. Other prior art references cited in this action are considered to claim one or more elements of the claimed invention, but do not provide motivation for combining those references with the closest prior art such that the claimed invention would be obvious to one skilled in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 703 308 7570. The examiner can normally be reached on normal weekday business hours (east coast time).
